International Facility Management Association:

Credentials and Training for Facility Management Professionals

General Services Administration
Authorized Federal Supply Schedule Price List

Multiple Award Schedule
PROFESSIONAL SERVICES SCHEDULE (PSS)
FSC GROUP: 00CORP

CONTRACT NUMBER: GS-02F-0133V
June 15, 2009 through June 14, 2024
Current through Modification No. PA-0053, effective September 2, 2022
Capability Statement
IFMA’s Core Competencies of Facility Management

- Communication: Develop the skills you need to be an effective liaison between external and internal stakeholders.

- Risk Management: Address the role of the Facility Manager in supporting or leading risk management planning, emergency preparedness, response and recovery, facility resilience and business continuity.

- Facility Information Management & Technology Management: Understand how to leverage modern tools and techniques for today’s workplaces and occupants.

- Occupancy and Human Factors: Grow your ability to support organizational and individual occupant performance, while leading the FM team to develop and implement practices necessary to achieve success.

- Real Estate: Understand real estate principles and practices and how they contribute to achieving the core business strategy.

- Performance and Quality: Define and make relevant what it means to capture fitness for the intended purpose, embrace a continuous improvement mindset, and satisfy stakeholders’ needs.

- Sustainability: Define the basics of five areas of sustainability and make relevant what it means to embrace sustainability.

- Finance & Business: Address the role of the Facility Manager in supporting the administration of the financial management of the FM organization, procurement and finances associated with contracts.

- Leadership & Strategy: Learn to be effective in leading the organization by providing guidance to staff and service providers and influence the decisions and attitudes of leaders, occupants, government officials, suppliers, community leaders and business partners.

- Operations & Maintenance: Develop a working knowledge of building systems, structure, interiors and exteriors and grounds so the facility and all its required systems function efficiently, reliably, safely, and securely and in a manner consistent with existing regulations and standards.

- Project Management: Understand how project management increases the capabilities of facility managers and how the facility manager determines their optimal role on a given project.

PAST PERFORMANCES

- Bureau of Overseas Building Operations
- United States Air Force
- NAVFAC
- National Park Service
- NASA
- Social Security Administration
- Chugach Government Solutions
- Federal Aviation Administration

DIFFERENTIATORS

- More than 40+ years of supporting the FM profession.
- IFMA holds the ANAB Accreditation for our globally recognized credentialing programs.
- IFMA training and credential programs are consistently updated to reflect changes to FM job roles, what facility professionals need for success and determine the performance standards against which FMs should operate or be measured on.

- White-glove support: Our team supports your team in achieving their learning goals.
- Flexibility: Our training is accessible online 24/7 and built to work with the busiest schedules.
- Performance tracking: Keep track and gain insights into team performance within the training programs.
- Proven experience helping organizations train large teams or departments.

For more information, visit ifma.org or contact corporateconnections@ifma.org.
IFMA’s Professional Development

Your path to FM mastery is so clear it even comes with a roadmap. Follow the path to earn more professional recognition and relevance.

Not sure where to start? Take our Career Compass at ifma.org.

**Path Finding**

**Skill Level/Course**

**Master**
- **Who**: Experienced professionals who meet eligibility requirements
- **What**: Demonstrate mastery of core competencies through knowledge and experience

**Authority**
- **Who**: Facility professionals with a strong foundation of FM knowledge
- **What**: Implement sustainable practices with any facility, regardless of age

**Proficient**
- **Who**: Facility professionals who want to round out their skills across the FM body of knowledge
- **What**: Complete your understanding of all core competencies of FM

**Skilled**
- **Who**: Individuals seeking to gain knowledge of standards and best practice*
  - *Typically FMP learners have at least one year of FM experience
- **What**: Gain knowledge in four foundational competencies

**Beginner**
- **Who**: New to FM or FM-adjacent role
- **What**: Gain high-level understanding of the role of a facility manager

| 611430 | **IFMA’s Communication Course**  
TC-IFMA20_CC_COM The goal of the communication course is to review, discuss, and explain the fundamental knowledge and skills a facility manager needs to be an effective and efficient communicator. This applies to formal and informal interaction. Such competence enables the facility manager to:  
• Prepares and deliver messages to achieve the intended result.  
• Develop, manage, or oversee the facility management communication plan.  
• Improve positive visibility of the FM function to all stakeholders.  
• Communicate effective and appropriately with senior management.  
• At the end of this course, participants will be able to:  
  • Create and deliver the right message for the intended result  
  • Develop an FM communication plan  
  • Identify and share relevant information to the appropriate audience | $195      | 4 Hours | 1 Participant Minimum |
| 611430 | **IFMA’s Occupancy and Human Factors Course**  
TC-IFMA20_CC_OHF One of the largest cost component during the facility life cycle is the salaries and benefits of occupants. When considered with this perspective, FM practices that support the productivity of people, organizational effectiveness, and minimize risk and liability is critical to the success of the demand organization. The competency, Occupancy and Human Factors, addresses the people element in the FM model. This course focuses on employee engagement and culture and crafting workplace experiences that reinforce the demand organization's value proposition. Facility managers demonstrate competency in Occupancy and Human Factors by mastering the knowledge and skills necessary to:  
• Support organizational and individual occupant performance.  
• Provide a quality workplace environment which includes occupant services, health, safety and security.  
• Develop and implement practices that support the demand organization’s performance.  
After completing this course, participants will be able to:  
• Articulate what Occupancy and Human Factors mean to a facility manager.  
• Identify best practices as they relate to Occupancy and Human Factors.  
• Interpret the occupancy health and safety management system described in ISO 45001.  
• Evaluate and provide occupant services, manage the services, and meet the safety and security needs of a facility’s occupant in accordance with the Occupancy and Human Factor competency. | $195      | 6 Hours | 1 Participant Minimum |

For more information, visit [ifma.org](http://ifma.org) or contact [corporateconnections@ifma.org](mailto:corporateconnections@ifma.org).
## IFMA’s Performance and Quality Course
TC-IFMA20-CC-PQ IFMA’s Performance and Quality Core Competency course will help facility managers to develop a “systems thinking” perspective and provide critical insights that apply to quality-related FM practices. Many performance and quality management techniques and practices described in this course have been around for years. The course brings them together and provides a comprehensive toolbox specific to facility management. After completing the course, participants will be able to:

- Work with their stakeholders to understand the needs and expectations for the facility and related service requirements.
- Understand and document the processes used to deliver these services.
- Measure the performance of the facility management (FM) organization and service providers to make continual improvements.
- Understand and describe what comprises a comprehensive Facility Management Quality System.
- Use the basic quality tools and basic statistical tools for better analysis of data with a quality system.

## IFMA’s Risk Management Course
TC-IFMA20_CC_RM Risk management has become a critical component of strategic management. It is the way an organization can live with the uncomfortable reality of risk. The facility manager’s role in risk management is to understand the vulnerabilities of the organization’s structures and infrastructure and balance the critical nature of the demand organization’s mission and functions against the possible occurrence and impact of a risk event. IFMA’s Risk Management course will prepare facility managers to support their organization’s risk management strategies for building a resilient organization. Facility managers demonstrate competency in Risk Management by mastering the knowledge and skills necessary to:

- Identify human and physical assets that would be at risk should a threat occur.
- Assess and evaluate the level of vulnerability should a threat occur.
- Prioritize the severity of each occurrence.
- Prepare a plan to mitigate as much risk as possible.

On completion of this course, participants will be able to:

- Evaluate the facility risks that could disrupt, compromise, or cause a failure of the demand organization and provide valuable input into risk management strategies to support the continuity of the business.
- Support the demand organization’s need for development, testing, and maintenance of a business continuity plan.
- Develop a Risk Management plan for FM operations that align with organizational strategy.
- Train FM staff in their roles and responsibilities in the event of a business interruption.
- Detail the resources required to support the facilities aspect of business continuity and plan for the provision of those resources in an emergency.

<td>611430</td>
<td><strong>IFMA's Sustainability Course</strong>&lt;br&gt;TC-IFMA20-CC-SUS An organization today is judged not just on the basis of the quality of the goods and services it produces but also on the care it shows people (both inside and outside the organization) and the environment. Additionally, many global drivers are pushing sustainability to the forefront of business, government and social conversations throughout the world. These drivers include:&lt;br&gt;• Awareness of the finite nature of resources available to support a steadily growing world population.&lt;br&gt;• Increasing use by governments of incentives and penalties to change corporate and individual behavior.&lt;br&gt;• Speed and breadth of information that have placed every organization under a microscope of public opinion about what constitutes acceptable corporate behavior.&lt;br&gt;As business leaders step up the corporate response to the sustainability agenda, facility managers are increasingly being asked to deliver support service that is broader and deeper than ever before. Sustainable development, as a concept, forces organizations to shift their focus from short term to long term. Facility management is a vital function, a service that supports the people who deliver the core business and is essential to the demand organization's aspirations for corporate social responsibility.&lt;br&gt;After completing this course, participants will be able to discuss the following concepts as they relate to sustainability and FM:&lt;br&gt;• Energy management&lt;br&gt;• Water management&lt;br&gt;• Materials and consumable management&lt;br&gt;• Waste management&lt;br&gt;• Workplace and site management</td>

<td>611430</td>
<td><strong>IFMA's Real Estate Course</strong>&lt;br&gt;TC-IFMA20-CC-RE Facilities represent a large part of any organization's assets – whether small or large, incorporated or unincorporated, public or private, profit or not-4-profit, domestic or international. There are many significant costs, risks and opportunities associated with owning and leasing facilities. Facility Managers need to understand the principles and practices of real estate and how these contribute to achieving the core business strategies of the demand organization.&lt;br&gt;This Real Estate Core Competency Course examines the interface between real estate decisions, facility management functions and the ability of the demand organization to achieve its goals. Facility managers will learn how to develop and implement a real estate strategy that includes methods to access, acquire, manage and dispose of physical assets.&lt;br&gt;After completing this course, participants will be able to:&lt;br&gt;• Develop and implement a real estate strategy to support the core business, including assessing, acquiring, and disposing of real estate, space management.&lt;br&gt;• Understand project management principles for managing new construction and other major projects.</td>

|         | TC-IFMA19-FMP-FB Facility managers oversee aspects of the demand organization that represent significant financial investment in technology, buildings, structures, interiors, exteriors and grounds. They are responsible for the oversight, operation and maintenance of the buildings and grounds as well as service contracts. The demand organization may choose to contract for services. Due to the dynamic global environment, finance and business management is a complex undertaking for general management. Finance and business in FM involves:  
  • The administration of the financial management of the FM organization  
  • Procurement  
  • Finances associated with contracts  
  • A facility manager's role in each area is shaped by the policies, practices and norms of the organizational environment. |           |        |              |
| 611430  | **IFMA’s Project Management: Confidently Manage Facility Projects from Start to Finish**       | $495      | 13 Hours | 1 Participant Minimum |
|         | TC-IFMA19-FMP-PM Facility managers play a major role on all aspects of project management beginning with planning, scoping, scheduling and evaluating. Project planning and management are core skills in FM. The skills are particularly important because of the wide range of projects assigned to the FM organization. Projects vary in scope, complexity, duration and financial risk. Facility managers’ project roles involve planning organizing, delegating, monitoring and controlling projects and ensuring that the interests of the FM organization and its customers are represented throughout the life-cycle of a project. However, a facility manager's role may vary depending on the specifics of the project and his or her capabilities and availability. |           |        |              |

|        | ITC-IFMA19-FMP-LS Leadership and strategy are tool sets that facility managers can use as appropriate to augment all FM activities. These activities include project management, operations and maintenance and finance and business. Facility managers serve in two leadership roles:  
|        | • First, they must lead the FM organization by providing guidance to staff and service providers.  
|        | • Second, they must influence the decisions and attitudes of the organization's leaders, occupants, government officials, suppliers, community leaders and business partners. |           |        |                     |
| 611430 | **IFMA's Operations & Maintenance: Effectively Manage your Facilities**                       | $495      | 15     | 1 Participant Minimum |
|        | TC-IFMA19-FMP-OM The primary role of facility managers is to manage/oversee an operating facility. To do this, facility managers must have a working knowledge of building systems, structure, interiors and exteriors and grounds so the facility and all of its required systems function efficiently, reliably, safely, securely and in a manner consistent with existing regulations and standards. In addition, the various aspects of operations and maintenance (O&M) are constantly changing due to wear or deterioration, new regulations or requirements, operational modifications, occupant expectations, and many other individual but interrelated circumstances. Managing a facility means continually managing change. |           |        |                     |

Not applicable

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor's website or other location.) The EIT standards can be found at: www.Section508.gov.
Not applicable

23. UNIQUE ENTITY (UEI) NUMBER:
F542MBQ5Q8J8

24. Notification regarding registration in System for Award Management (SAM) database:
Company is registered at SAM.gov

**Service Contract Labor Standards**: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and / or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
