

# IFMA's Information and Technology Management

Student Guide

**IFMA**<sup>TM</sup>  
International Facility Management Association  
Empowering Facility Professionals Worldwide

# Table of Contents

- IFMA Credentials**
- About IFMA Credentials**
- Facility Management Professional (FMP) Program**
- IFMA's Core Competency Courses**
- Course Overview**
- Introduction**
- Course Expectations**
- Course Audience**
- Course Chapters**
- Course Objectives**
- Chapter 1: Information Technology, FM, and the Organization**
  - Chapter 1: Introduction**
    - Overview & Objectives**
  - Lesson 1: Using Technology to Support Organizational Strategy**
    - Lesson 1: Introduction**
    - Technology's Role in Meeting 21st Century Workplace and Organizational Needs**
    - Facility Management and Strategic Goals**
    - Shifts in Organizational Strategy and Technology**
  - Lesson 2: Organizational Trends and Technology**
    - Lesson 2: Introduction**
    - Organizational Trends**
    - Trends in Detail**
    - Benefits of Technology to the Organization**
    - Strategic Alignment and Technology Projects**
  - Lesson 3: Technology and Stakeholder Needs**
    - Lesson 3: Introduction**
    - Stakeholders and Technology**
  - Lesson 4: IT and the Impact on Facility Management**
    - Lesson 4: Introduction**
    - Timeline of Facility Management Technology**
    - Technological Trends and Facility Management**
    - Implications of Technology Trends on the Facility Manager**
  - Lesson 5: IT & FM: What is the Relationship?**
    - Lesson 5: Introduction**
    - Building a strong IT/FM relationship**
    - IT as a Customer of FM**
    - FM as a customer of IT**
    - IT & FM Applications**
  - Chapter 1: Progress Check**

## **Chapter 2: Data Collection and Information Management**

### **Chapter 2: Introduction**

#### **Overview & Objectives**

### **Lesson 1: Data Collection and FM**

#### **Lesson 1: Introduction**

#### **Data and its Implications on Facility Management**

#### **Data Collection and Storage**

#### **Data Collection Best Practices**

#### **Common Examples of Facility Data**

#### **Data Storage**

#### **Data Standardization**

### **Lesson 2: Data-Driven Facility Management**

#### **Lesson 2: Introduction**

#### **Introduction: Data-Driven Facility Management**

#### **Data Analytics**

#### **Analytics Capabilities Framework**

#### **Leveraging Analytics**

### **Lesson 3: Minimizing the Risks of Data Corruption**

#### **Lesson 3: Introduction**

#### **Introduction**

#### **Data Corruption and Integrity**

#### **User Authorization and Governance**

#### **Preserving Data Integrity**

### **Lesson 4: Data Backup for Resilience**

#### **Lesson 4: Introduction**

#### **Introduction: Resilience**

#### **Data Backup**

#### **Developing a Data Backup Plan**

#### **Backup Storage Options**

#### **Chapter 2: Progress Check**

## **Chapter 3: IT & Security Basics for FM**

### **Chapter 3: Introduction**

#### **Overview & Objectives**

### **Lesson 1: Networking Principles**

#### **Lesson 1: Introduction**

#### **Introduction**

#### **Computer Networking**

#### **Structure of Network: Topology**

#### **Networks: Routers Switches & Wireless Access Points**

#### **Data Communication in Networks**

#### **Expansion of Network**

#### **Internet, Intranet, Extranet & Cloud Services**

## **Lesson 2: Wireless Networks**

**Lesson 2: Introduction**

**Introduction**

**Hybrid Communication System**

**Benefits of Wireless Networks**

## **Lesson 3: Databases and Software**

**Lesson 3: Introduction**

**What are databases?**

**Software**

## **Lesson 4: IT Security for Facility Managers**

**Lesson 4: Introduction**

**Introduction**

**Types of IT Security**

**Data & Security in FM Software**

**Information Security via the Internet**

**Remote Access VPN**

**Firewalls**

**Cloud Security**

**Security Data in Transit Vs. Rest**

**Service Availability & Resilience**

**Chapter 3: Progress Check**

# **Chapter 4: Computer Aided Facility Management Systems (CAFM)**

## **Chapter 4: Introduction**

**Overview & Objectives**

## **Lesson 1: What is a CAFM?**

**Lesson 2: Introduction**

**What is Computer-Aided Facility Management (CAFM)?**

**CAFM Systems**

## **Lesson 2: Why Use CAFM?**

**Lesson 2: Introduction**

**The Case for CAFM?**

**CAFM Management and Functional Features**

**What are the benefits of CAFM?**

**CAFM Development and Trends**

## **Lesson 3: FM Applications and IT Support**

**Lesson 3: Introduction**

**Introduction: The CAFM Model**

**Methods for Collecting Inventory Data**

**Model Oriented CAD**

**Space Management**

**BIM & Space Management**

**Contract Management**  
**Cleaning Management**  
**Benefits of IT Supported Cleaning Management**  
**Move Management**  
**Energy Management**  
**Property Management**  
**Maintenance Management**  
**Chapter 4: Progress Check**

## **Chapter 5: Tools and Concepts**

### **Chapter 5: Introduction**

**Overview & Objectives**

### **Lesson 1: Facility Management and Control Systems**

**Lesson 1: Introduction**

**Integrated Workplace Management Systems (IWMS)**

**Computerized Maintenance Management Systems (CMMS)**

**Building Automation Systems (BAS)**

### **Lesson 2: Building Imaging & Modeling**

**Lesson 2: Introduction**

**Building Information Modeling (BIM)**

**Perspectives on BIM**

**BIM Architecture and Integration**

**BIM Advantages**

**Implementing BIM**

**Mini-Case: Implementing a BIM in the 2012 London Olympics**

### **Lesson 3: Emerging Tools, Technologies and Applications**

**Lesson 3: Introduction**

**Assessing Emerging Tools and Technologies**

**Internet of Things (IoT)**

**Augmented Reality (AR)/Virtual Reality (VR)**

**Artificial Intelligence (AI)**

**Drones and Aerial Imaging**

**Chapter 5: Progress Check**

## **Chapter 6: Assessment**

### **Chapter 6: Introduction**

**Overview & Objectives**

### **Lesson 1: Needs Assessment**

**Lesson 1: Introduction**

**Assessing the Potential of Technology**

**The Project Planning Process**

**Technology Needs Assessment**

### **Lesson 2: Implementation**

**Lesson 2: Introduction**

- Developing a Business Case
- Technology Implementation Process
- Case Study: CMMS Implementation (PDCA)
- Lesson 3: Facility Condition Assessment**
  - Lesson 3: Introduction
  - The Facility Condition Assessment (FCA)
  - The Facility Condition Index (FCI)
  - FCA Deficiencies
  - The Facility Condition Report (FCR)
- Lesson 4: CAFM Return on Investment (ROI)**
  - Lesson 4: Introduction
  - CAFM & Return on Investment (ROI)
  - Calculating Return on Investment
  - Determining CAFM "Value"
  - Mini-Case: Calculating ROI at ABC Manufacturing
- Chapter 6: Progress Check

## **Progress Check Question Answer Key**

- Chapter 1: Information Technology, FM, and the Organization
- Chapter 1: Introduction
- Chapter 2: Data Collection and Information Management
- Chapter 2: Introduction
- Chapter 3: IT & Security Basics for FM
- Chapter 3: Introduction
- Chapter 4: Computer Aided Facility Management Systems (CAFM)
- Chapter 4: Introduction
- Chapter 5: Tools and Concepts
- Chapter 5: Introduction
- Chapter 6: Assessment
- Chapter 6: Introduction
- References
