About IFMA Credentials

Facility Management Professional (FMP) Program

IFMA's Core Competency Courses

Course Overview

Introductory Activity

Course Expectations

Course Audience

Course Chapters

Course Objectives

Chapter 1: Introduction to FM Sustainability

Introduction to FM Sustainability

Introduction

Lesson 1: Triple Bottom Line

Triple bottom line

Actions Must Have Balance

Lesson 2: Aligning Organizational Strategy with Sustainability

Three Aspects of Sustainability

Sustainability Policies

Rules to Live By

Example: A Sustainable Leasing Policy

Benefits of a Sustainability Policy

Selling the Benefits

Sustainable Plan Development

Assessing the Organization's Position on Sustainability

Internal and External Functions to Promote Sustainability.

Progress Check Questions Chapter 1

Chapter 2: Energy Management

Chapter 2: Energy Management

Introduction

Lesson 1: What is Energy Management?

Introduction

Three Goals of Energy Management

Zero Net Energy Buildings

Upgrading the Building Envelope

Improving the Efficiency of Core Systems

Optimizing Energy Use

Renewable Resources

Use Renewable Resources

Lesson 2: Use Energy More Efficiently

- Introduction**
- Understanding Electrical Energy Pricing Factors**
- Demand Response**
- Changing Occupant Behaviors**
- Implement a Carbon Trading Policy**
- Renewable Energy Credits (RECs)**
- Lesson 3: Energy Management Evaluation**
 - Introduction**
 - Terminology Specific to Energy Management**
 - Facility Managers Need to Understand Terminology**
- Lesson 4: Energy Efficient devices**
 - Energy Star**
 - Electric Submeters**
 - Energy Management System**
 - IoT Technology**
 - Plug Load Controllers**
- Lesson 5: Reducing Energy Use**
 - Introduction**
 - Controlling Devices**
 - Computer Center**
- Lesson 6: Energy-efficient Systems**
 - Introduction**
 - Building Automations Systems (BAS)**
 - Efficient HVAC Systems**
 - Renewable Power Sources**
 - Computer Power Management**
- Lesson 7: Energy-efficient Operational Processes**
 - Introduction**
 - Commissioning (Cx) and Retro Commissioning (RCx)**
 - Measurement and Verification**
 - Operational Practices**
 - Energy Audit**
 - Energy Performance Contracting**
 - Performance Contracting Case Study Part 1**
 - Performance Contracting Case Study Part 2**
 - Reducing Power Usage**
 - Chapter 2: Progress Check**
- Chapter 3: Water Management**
 - Chapter Introduction**
 - Introduction**
 - Lesson 1: Introduction to Water Management**
 - Introduction**
 - Water Flow**

Implementing a Water Management Program
Lesson 2: Minimizing Utilization of Potable Water

Introduction

Reduce Water Loss and Educate Users

Monitoring and Measuring

Use Water-Efficient Equipment

Lesson 3: Methods to Reduce Water Waste

Introduction

Rainwater Harvesting

Greywater

Chapter 3: Knowledge Check

Chapter 4: Materials and Consumable Management

Chapter 4 Introduction

Materials and Consumable Management

Lesson 1: Introduction to Materials and Consumables Management

Introduction

Materials and Consumable Management is Extensive

Product Life Cycle

Sustainability and Costs

Facility Manager's Point of View

Benefits of Sustainable Procurement

Barriers to Sustainable Procurement

Building a Sustainable Supply Chain

Lesson 2: Renewable Resources

Introduction

Renewable Resources

Protecting Endangered Species

Lesson 3: Minimizing the Use of Substances that Harm Health and the Environment

Introduction

Common and Abundant Hazards

Use of Biodegradable Materials

Use of Natural Alternatives

Lesson 4: Purchasing Materials & Resources that Promote Ethical Behavior & Corporate Social Responsibility

Introduction

Definition Social Responsibility and Ethical Behavior

Chapter 4: Progress Check

Chapter 5: Waste Management

Chapter 5: Waste Management

Introduction

Lesson 1: Introduction to Waste Management

Introduction

Facility Managers Take the Lead

Waste Collection

Lesson 2: Procurement Activities that Promote Consumption of Materials to Appropriate Levels

Introduction

Construction & Renovation Projects: Large Waste Streams

Lesson 3: Recycling and Waste Diversion

Introduction

Recycling

Characteristics of a Recycling Program

Recycling Guidelines

Waste Diversion

Protecting the Natural Environment

Lesson 4: Waste Disposal Techniques that do not Harm the Natural Environment

Introduction

Disposal of Organic Waste

Chapter 5: Progress Check

Chapter 6: Workplace and Site Management

Chapter 6: Waste Management

Introduction

Lesson 1: Indoor Environmental Quality (IEQ)

Introduction

Indoor Environmental Quality

Thermal Comfort

Lighting

Views and Access to Daylight

Sound and Acoustics

Lesson 2: Standards and Guidelines

Introduction

Standards and Guidelines

Certifications

Chapter 6: Knowledge Check

Progress Check Question Answer Key

Chapter 1: Introduction to FM Sustainability

Introduction to FM Sustainability

Chapter 2: Energy Management

Chapter 2: Energy Management

Chapter 3: Water Management

Chapter Introduction

Chapter 4: Materials and Consumable Management

Chapter 4 Introduction

Chapter 5: Waste Management

Chapter 5: Waste Management

Chapter 6: Workplace and Site Management

Chapter 6: Waste Management

Appendix
